PROFESSIONAL SUMMARY:

Highly motivated, self-starting developer seeking to launch a career building web applications and services.

SKILLS:

- React
- JavaScript
- CSS
- HTML
- Python
- OOP
- GIT
- Bootstrap
- API Integration
- Sass

Web App for NGO RangTarang using React JS and API Integration (Project 1, 2022):

(www.rangtarang.ca)

- Made use of React states and React hooks as well as third-party form applications and Api integration to create add to calendar functionality.

- Created a fully functional web app with the ability to subscribe to a newsletter, leave messages and book events in your personal calendar so that the client doesn't miss any important get-togethers and can interact with the NGO as they see fit.

Personal Portfolio Website (Project 2, 2021):

(https://akashpandya.github.io/)

- Skillfully demonstrated the functionality that Bootstrap as a framework provides using grid display to make a web-design responsive across all platforms.

- Showcased CSS Hover animations and Document download as well as Form functionality by creating interactive and dynamic web pages.

WORK EXPERIENCE:

Freelance (Ontario, CA)   *July 2021 to Current Frontend Web Developer*

- Designing professional websites that are responsive, dynamic, and interactive.

- Continuing to learn more exciting and complex frameworks, libraries and languages like Node JS and Python while implementing them in new projects to get hands-on experience.

CIBC (Oshawa, ON)   *January 2022 to Current*

Account Processing Officer

CBV Collection Services Ltd. (Markham, ON)   *September 2020 to March 2021*
Collections Representative

Kumon North America, Inc. (Ajax, ON)   *January 2019 to August 2020*
Assistant Teacher

TD Canada Trust (Markham, ON)   *October 2018 to January 2019*
Account Specialist

EDUCATION

IBM Front-End Developer Professional Certificate   *Completed: December 2023*

- All 8 courses successfully completed

- Certificate obtained: IBM Front-End Developer Professional

Final Project Summary:

- Designed responsive layouts for various website components using UI/UX design principles and Figma.

- Utilized React to create dynamic components and convert static pages into a responsive website.

- Demonstrated proficiency in version control with GitHub, effectively managing the software development process from building to deployment and updates.
